CUTTING LIST

Cover	Quantity	Length (mm)

- Minimum Length: 600mm
- Production lead times apply

* Consult Revolution by Design if sheet lengths longer than 8m required.

Oil Canning is an inherent characteristic of non-ferrous metals with broad flat areas. The Architect, Builder, and Homeowner needs to be aware that oil canning may affect the overall aesthetic outcome. There are measures that can be taken during design and installation to minimise the risk of oil canning such as ensuring the plywood is flush, the panels are fixed vertically, limiting the continuous length of each panel, and reducing the size of the pan.
