REVOLUTION RAINWATER GOODS

When it rains, we're indoors innovating new ways to tackle the storms. Revolution by Design's range of rainwater goods keeps expanding: proof that we don't come down with the latest showers. Not only do we have the largest range of rainwater goods in Western Australia, we also have the biggest downpipes and gutters.

And while those who are dear to us tell us size doesn't matter, deep down, we know it does - especially when it come to carrying large volumes of water off your roof. We also have the largest jobbing workshop, offering custom and standard capping, vents and rainheads.

GUTTERS *signifies slotting is available

LEAFGUARD - REVGUARD

Revguard is a high strength leaf gutter guard system that is easy to install and suits both corrugated or tiled roofing. With an option for two hole sizes – 3.25mm or 8mm, Revguard is made to order in lengths up to 8m. It protects gutters from a variety of foliage and other debris, which assists in reducing fire hazards.

FLASHINGS

Revolution by Design has successfully innovated the flashings business with our exclusive RevBend system. It's the world's fastest, most efficient and highly accurate 3D drawing and ordering system for flashings. It works with our robots 24 hours a day guaranteeing your order is processed for the next day. Flashings up to 8 metres long can be folded to any custom design - and you can also order the rest of your roof on it too, with RevBend's NEW catalogue feature.

REVBIG DOWNPIPES

Revolution by Design now roll steel round downpipes to length up to 6m. That's two storeys with one downpipe. No unnecessary cutting, or joining! And If you need to join them, we offer crimping and expanding services which are highly effective and aesthetic. With diameters from 60-300mm, Revolution by Design will make sure all the water on your roof doesn't end up in your roof.

RAINHEADS

We have a large range of custom rainheads to suit any building or project. Each is handcrafted to suit the unique requirements of the project and they are available in an endless range of finishes and sizes. Rainheads are a decorative finish to any building, while minimising the risk of water flow inside a building. We have a standard selection of rainhead designs, but they can be made to custom design

for your special project. Rainheads are available in a wide range of materials and finishes from COLORBOND® Steel to Stainless Steel and even Heritage Galvanised. When ordering a Revolution rainhead, we recommend you discuss your requirements with a Revolution by Design expert to ensure you consider all the important elements.
